PROFESSIONAL SUMMARY

Software Engineer with experience building backend systems, real-time applications, and AI-based solutions. Skilled in Python, JavaScript, React.js, Node.js, and FastAPI, with a focus on performance and scalable architecture. Developed projects involving computer vision, WebSocket communication, and AWS-based deployments. Currently working at TCS, contributing to backend services and data pipelines for enterprise applications.

EXPERIENCE

Tata Consultancy Services (TCS) | Assistant System Engineer

December 2025 - Present

- Developing backend services using Python and Node.js, building scalable RESTful APIs and efficient data processing workflows for enterprise applications.
- Implemented serverless data pipelines using AWS Lambda, S3, and DynamoDB to enable automated, reliable event-driven data ingestion and processing.
- Configured secure access control using AWS IAM roles and optimized application workflows to significantly improve overall performance and system reliability.

Fundbridge Consultation Ltd. | SDE Intern

July 2025 - December 2025

- Developed 13+ RESTful API endpoints using Node.js, Express, and PostgreSQL, implementing complete CRUD functionality for investment products and admin management systems.
- Built a full-stack product management platform with JWT authentication, Cloudinary integration for media handling, and automated daily earnings calculation features.
- Resolved multiple critical production issues and integrated Flutterwave payment gateway, improving system stability, error handling, and overall transaction processing efficiency.

PROJECTS

Smart Attendance System

[GitHub](#)

- Developed a facial recognition-based attendance system using OpenCV and face_recognition, implementing anti-spoofing techniques to achieve over 95% accuracy across varying conditions.
- Built a FastAPI-based backend with SQLAlchemy ORM, JWT authentication, and role-based access control for secure and scalable user management.
- Designed an analytics dashboard to track attendance trends and productivity insights for 500+ users, with automated PDF and Excel report generation.

Pulse

[Live](#) [GitHub](#)

- Architected and deployed a full-stack project management platform using Next.js, NestJS, and PostgreSQL, supporting real-time collaboration for 500+ concurrent users.
- Implemented WebSocket-based communication and JWT authentication to enable secure, low-latency updates and seamless user interactions.
- Optimized backend performance to achieve sub-200ms API response times and high system reliability for handling 1000+ daily operations.

SKILLS

- Languages & Scripting:** Python, Java, JavaScript (ES6+), TypeScript, Bash
- Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, FastAPI, Flask, Tailwind CSS
- Databases & ORMs:** PostgreSQL, MongoDB, MySQL, SQLite, Firebase, Prisma ORM, Supabase, SQLAlchemy
- Cloud & DevOps:** AWS (Lambda, S3, DynamoDB), GitHub Actions, CI/CD, Vercel, Netlify, Render, Railway
- Tools & Technologies:** OpenCV, face_recognition, NumPy, scikit-learn, JWT, OAuth, Socket.io, Git

CERTIFICATES

- AWS Certified Cloud Practitioner CLF-C02** - 2026
- Top 1% Performer** - EY Cyber Security Boot Camp (2024)
- Amazon ML Summer School** - 2024
- AWS Academy Cloud Foundations, Architecting & Security** - 2024
- Azure Fundamentals Cloud Skills Challenge** - 2023

EDUCATION

ITER, Siksha 'O' Anusandhan University

B.Tech, Computer Science and Engineering

November 2021 - August 2025

Bhubaneswar, Odisha
