PROFESSIONAL SUMMARY

Results-driven Software Engineer specialising in Python, JavaScript, React.js, Node.js, and AI/ML technologies. Proven expertise in building scalable microservices, real-time applications, and enterprise-grade solutions. Strong background in computer vision, WebSocket communication, cross-functional collaboration, and event-driven architectures.

EXPERIENCE

Fundbridge Consultation Ltd. | SDE Intern

October 2025 - Present

- Developed 13+ RESTful API endpoints using Node.js, Express, and PostgreSQL, implementing complete CRUD operations for investment products and an admin management system, resulting in 100% feature delivery
- Built a full-stack product management platform with JWT authentication, Cloudinary image upload, and automated daily earnings calculation, supporting 14 product types across 2 database tables
- Fixed 6 critical production bugs, including authentication middleware errors and database schema issues, optimised CORS configuration, and integrated Flutterwave payment gateway for seamless transaction processing

Detour Berlin | Freelance Software Developer

April 2025 - September 2025

- Collaborated with cross-functional teams to build an e-commerce platform using Next.js, React.js, TypeScript, and Tailwind CSS, serving 500+ VIP users with 99.9% uptime and seamless user experience.
- Architected scalable microservices with Node.js, Express.js, and Firebase, integrating JWT authentication, OAuth 2.0, and RBAC, while designing RESTful APIs with 200ms average response time to support multi-tenant operations across 5+ brands.
- Enhanced performance and delivery by implementing Framer Motion and GSAP animations (boosting session duration by 40% and engagement by 25%) and automated CI/CD pipelines via GitHub Actions.

PROJECTS

Smart Attendance System

[Github](#)

- Implemented advanced anti-spoofing technology and computer vision algorithms using OpenCV, achieving 95%+ accuracy in facial recognition across diverse lighting conditions and user demographics.
- Designed comprehensive analytics dashboard tracking 7-day trends and productivity insights across 500+ users with real-time data visualization and automated report generation.
- Built production-ready FastAPI application with SQLAlchemy ORM, JWT authentication, role-based access control, and automated PDF/Excel report generation.

Ticket Dashboard

[Github](#)

- Architected a full-stack project management dashboard using Next.js and NestJS with PostgreSQL, implementing real-time WebSocket communication and JWT authentication for 500+ concurrent users. Achieved sub-200ms API response times and 99.9% uptime for enterprise-scale ticket management.
- A modern ticket management platform with email-based OTP authentication and real-time collaboration, supporting 1000+ daily operations. Implemented Socket.io integration and Prisma ORM, resulting in 40% faster ticket resolution and 95% user satisfaction.

SKILLS

- Languages & Scripting:** Python, Java, JavaScript ES6+, TypeScript, Bash
- Web Development:** React.js, Flask, Next.js, Node.js, FastAPI, Express.js, Tailwind CSS, HTML5, CSS3
- Cloud & DevOps:** AWS (S3, Route53, CloudFront, ACM), GitHub Actions, Vercel, Netlify, Render, CI/CD pipelines
- Databases & Storage:** MongoDB, SQL, Firebase, SQLite, PostgreSQL, Prisma ORM, SQLAlchemy
- AI & Tools:** OpenCV, face_recognition, Numpy, dlib, JWT, OAuth, Git, scikit-learn, Socket.io

CERTIFICATES

- Top 5% Performer** – EY Cyber Security Boot Camp (2024)
- Amazon ML Summer School** – Amazon (2024)
- AWS Academy Cloud Foundations, Architecting & Security** – AWS Academy (2024)
- Azure Fundamentals Cloud Skills Challenge** – Microsoft (2023)
- LeetCode in Java: Algorithms Coding Interview Questions** – Udemy (2023)

EDUCATION

ITER, Siksha 'O' Anusandhan University

B.Tech, Computer Science and Engineering

November 2021 - August 2025

Bhubaneswar, Odisha
