PROFESSIONAL SUMMARY

Software Engineer with experience building scalable backend systems, cloud-native applications, and conversational AI solutions for enterprise platforms. Skilled in designing distributed, event-driven applications, optimizing system performance, automating business workflows, and delivering secure, production-ready software with a focus on scalability, reliability, and engineering best practices.

EXPERIENCE

Tata Consultancy Services (TCS) | *Cloud Application Engineer*

December 2025 - Present

- Designed and delivered conversational AI solutions by transforming traditional DTMF-based IVR into natural voice interactions, improving customer self-service and call automation.
- Developed and optimized 5+ backend services and event-driven workflows supporting 15K+ monthly customer interactions, reducing manual operational effort by over 40%.
- Delivered scalable, production-ready cloud-native solutions that enhanced application performance, optimized workflow efficiency, and improved system reliability for enterprise contact center platforms.

Fundbridge Consultation Ltd. | *SDE Intern*

July 2025 - December 2025

- Developed 13+ RESTful API endpoints using Node.js, Express.js, and PostgreSQL, enabling secure CRUD operations for investment and administration modules.
- Built a full-stack product management platform with secure authentication, media management, and automated financial calculations, improving operational efficiency.
- Resolved production issues and integrated payment gateway services, enhancing transaction reliability and application stability.

PROJECTS

Smart Attendance System

[Live](#) [GitHub](#)

- Developed a facial recognition-based attendance system using OpenCV and face_recognition, implementing anti-spoofing techniques to achieve over 95% accuracy across varying conditions.
- Built a FastAPI-based backend with SQLAlchemy ORM, JWT authentication, and role-based access control for secure and scalable user management.
- Designed an analytics dashboard to track attendance trends and productivity insights for 500+ users, with automated PDF and Excel report generation.

Pulse

[Live](#) [GitHub](#)

- Developed a scalable project management platform supporting 500+ concurrent users with secure authentication and real-time collaboration.
- Implemented real-time communication features and optimized backend APIs to achieve sub-200ms response times across 1,000+ daily operations.
- Designed secure RESTful APIs with role-based authentication, improving application security, maintainability, and backend scalability.

SKILLS

- Languages:** Python, Java, JavaScript (ES6+), TypeScript, SQL, Bash
- Backend Technologies:** Node.js, Express.js, FastAPI, Flask, React.js, Next.js
- Cloud & AWS:** Amazon (Connect, Bedrock, Lex, Lambda, S3, DynamoDB, CloudFront, EC2, IAM)
- Databases:** PostgreSQL, MongoDB, MySQL, SQLite, Firebase, Prisma ORM, SQLAlchemy
- DevOps & Tools:** Git, GitHub Actions, CI/CD, REST APIs, JWT, OAuth, OpenCV, NumPy, scikit-learn, Socket.io

CERTIFICATES

- AWS Certified Cloud Practitioner CLF-C02** | 2026
- Top 1% Performer** – EY Cyber Security Boot Camp | 2024
- Amazon ML Summer School'24** | 2024
- AWS Academy Cloud Foundations, Architecting & Security** | 2024
- Azure Fundamentals Cloud Skills Challenge** | 2023

EDUCATION

ITER, Siksha 'O' Anusandhan University

B.Tech, Computer Science and Engineering

November 2021 - August 2025

Bhubaneswar, Odisha
